

Knockdown™ Odor Neutralizer

Product Overview

A highly concentrated and specially formulated water based odor solution that neutralizes odor molecules. The neutralizing agents “surround” the offending malodor and effectively encapsulate them upon contact. The active ingredient is a water-based compound that features a semi-rigid, concave molecular structure. This theoretical internal cavity has a unique ability that “captures” malodor molecules and holds them hostage. “Knockdown” has been proven effective against mercaptans, amines, sulfides, smoke, urea, pet urine, etc.

A light scent may be added to the product to provide a pleasant environment for neighbors and on-site personnel.

Environmentally friendly, biodegradable, and non-toxic

Uses and scents

Knockdown products can be used in a wide variety of applications.

- Pressurized Misting Systems
- Rotary Atomizing units
